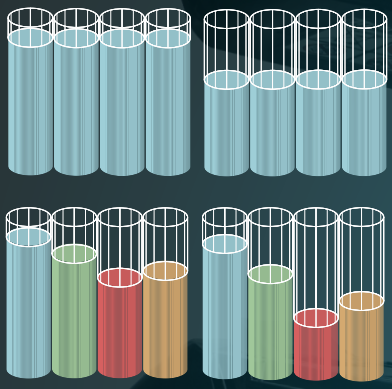
MAKITA LI-ION BATTERY RANGE

Makita's twin 18v machines deliver more power and runtime without leaving the 18v Lithium-ion platform

WELL BALANCED CHARGING



WELL BALANCED CHARGING

The Makita Lithium-ion battery chargers evenly throughout all the cells, and on discharging it draws evenly, resulting in an optimum charge.

UNBALANCED CHARGING

Cells in some other brands of batteries are not charged evenly, resulting in cells not being used completely, so that workloads are decreased at a charge.

UNBEATABLE CHARGE TIMES ON ALL MAKITA 18V LI-ION BATTERIES

A great advantage of Lithium Ion technology is that it provides the user with the possibility to charge the batteries anytime, without any need to wait for their complete power deployment. A great improvement compared to older technologies like Ni-Cad.
